

Pipe Cutting Portable Tube Saw - PS 4.5

Tube cutting is now easy! With the PS 4.5 Portable Tube Saw. Cutting thin-walled stainless-steel tubes and elbows using the superior 'planetary cutting technology'. Deformation-free clamping system by integrated clamping jaws made from hardened aluminum-cast for different tube diameters.

Tubes: 6 mm-120 mm

- Lightweight and easily transportable machine (only 23 kg) to provide flexibility for on-site applications.
- Deformation-free clamping of thin-walled tubes.
- For cutting of thin-walled tubes and elbows.
- Cutting of stainless steel tubes with a OD No rework necessary because of a burr-free and square cut.
- Cold cutting process prevents corrosion.
- Integrated laser pointer to determine the cut off point.
- Orbital cutting process saves time.
- Multipoint clamping system of tubes.
- Fast adjustment of tube dimensions.

Now available with press fitting blade/bevel combination cutters.
