

Pipe Beveling Boiler Pipe Tube Beveller - BRB 4

Powerful and robust Pneumatic Boiler Prep Machine. Counterboring and axial turning of pipes made from high-alloy steel (stainless steel), low-alloy and carbon steel with the unique tool system QTC. Designed for pipe end preparations and boiler pipe applications.

Tubes: Kit3: 38.5 - 114.3 Kit5: 23.0 - 114.3

Handy, easy to use and compact design.

Very precise and reproducible weld preparation.

High performance and lightweight.

Fast application with the BRB Pneumatic/Auto by means of pneumatic clamping, ideal for continuous production e.g. boiler and heat exchanger applications.

High-performance coated tool bits with up to 4 cutting edges.

Quick clamping system for tools with easy adjustment.

Adjustable air outlet.

Easy to change tools.

Tools adaptable on all BRB machines.

Up to 3 tools can be used at the same time.
